DETAILED ACTION

Specification

1. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

Claim Objections

2. Claims 4-6 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from other multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claims 4-6 not been further treated on the merits.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3723

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 1,088,621. '621 discloses a grinding method simultaneously grinding plural grinding portions of a workpiece by plural grinding wheels moved individually to each other, comprising: terminating said grinding by a predetermined grinding wheel prior to a termination of said grinding by the other grinding wheel; wherein said grinding includes plural grindings; and each said grinding has a same content of said grinding by each grinding wheel and wherein a grinding condition of said each grinding by said each grinding wheel is changed according to a result of measuring said grinding portions. Please refer especially to [0038].
